

LOCK-ONE BULLET NUT

mechanically locking fasteners

SKY CLIMBER
FASTENERS, LLC

The LockOne Bullet Nut is a revolutionary positive locking fastener designed to prevent loosening under vibration. LockOne Bullet Nut coils stretch when tightened, providing superior locking force WITHOUT cotter pins, safety-wire, adhesives, locking washers, crimp nuts and other types of locking fasteners.

one-piece solution

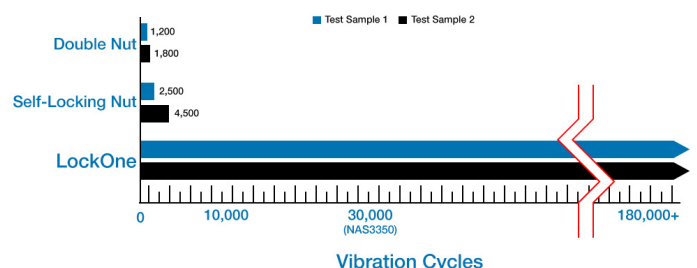

Due to the unique LockOne Bullet Nut design, the assembly is FOD-free. Plus, unlike nuts with nylon or locking compounds, the LockOne does not degrade with use. The design eliminates the need for cotter pins, lock wire, jam nuts, and other locking mechanisms or adhesives.

superior force

Once installed, the LockOne Bullet Nut engages the bolt along the pitch diameter inducing spring forces both axially and radially. These forces hold LockOne in place, preventing bolts from loosening under vibration.

Plus, Sky Climber Fasteners can adjust the specifications to meet your requirements in material, finish, and size. Call us today to find the right LockOne Bullet Nut for your application.

Material options and available finishes	Available in virtually any material: <ul style="list-style-type: none"> • Carbon Steels • 4340 • 300 Series S/S • A286 CRES • Inconel 718
Possible Part configurations	<ul style="list-style-type: none"> • Unified Coarse Threads (UNC) • Unified Fine Threads (UNF) • Metric Threads • With or without Rhino Locknut Inserts
Size options	Currently available in ¼" up to 1½".
Installation	No special tooling required. Easily installed and removed with 12-point socket
Performance	Passes 30,000 cycle accelerated vibration testing per NAS3350 and has exceeded 180,000 cycles
Applications	<ul style="list-style-type: none"> • Aerospace • Automotive • Agriculture • Construction • Telecom Towers
Replacement for:	<ul style="list-style-type: none"> • Replaces castellated nuts • Replaces jam nuts • Replaces Cotter Pins • Replaces Nord-Lock® • Replaces Hardlock® • Replaces Safety Wire

engineering EXCELLENCE

At Sky Climber Fasteners, we believe excellence is a never-ending pursuit driven by a culture of continuous improvement.

Our next generation of fasteners is designed to exceed the rigorous demands of mission- and safety-critical applications. As a result, these advanced products are perfectly suited for any high-performance application where weight, strength, durability and quality must be tightly controlled.

Innovative design-to-solution provider

Fastener experts with 75+ years of experience

Responsive, cost-effective and on-time

We provide custom and unique products individually designed to meet the specific needs of our customers. We are driven to lead and ensure that our products are engineered in excellence while designing products that solve our customers' fastener issues. Products include:

- Barrel Nuts
- High Strength Locknuts
- Hybrid Locknuts
- Isolator Mounts
- Mantis Precision Torque Locknut
- LockOne Bullet Locknut
- A Variety of New, Custom Fastening Solutions and Systems

With 19 patents filed in the last two years alone, Sky Climber Fasteners is pushing the boundaries of the fasteners industry. These products will improve installation times and increase safety factors on your aerospace, commercial and automotive projects.

As part of the Sky Climber family of companies, Sky Climber Fasteners delivers the same level of quality services that the world has come to expect from companies bearing the Sky Climber name. AS9100C, EN 9100:2009, JISQ 9100:2009 and ISO 9001:2008 registered.
